T-SAP Advisory: TSAP-14-002		Email Subscribe Unsubscribe Print	
Status: Active		Effective Date: 06/02/2014	
Facility Information			
NAS Category:	Equipment:	Locations:	Fac ID Code:
OTHER	ALL	ALL	N/A
Event Information			
Title:	..		
Problem:	At present, only facilities with more than 50 employees have received funding for Automated External Defibrillators (AEDs) through the FAA National Voluntary Public Access Defibrillation (PAD) Program. There are ongoing discussions surrounding methods and funding for the remaining facilities to be included in this program, but these facilities are not yet nationally funded.		
Symptom:	The current AED program roll-out status may give facilities the impression that they cannot obtain AEDs.		
Solution:	Facilities with fewer than 50 employees are eligible to purchase new AED equipment with local funds if they coordinate with the National PAD Program Office and comply with program guidelines. Facilities must contact the PAD Program Office at the numbers listed in the POC Information section of this Advisory before taking any action. More information about the program and guidelines is available on the AED website at: https://employees.faa.gov/org/staffoffices/ahr/emp_safety_workers_comp/emp_safety/aed_program/ .		
Remarks:	If you have additional information that pertains to the subject of this document we encourage you to file your own T-SAP report. Information you possess may be unknown to the ERC and could augment existing reports. These additional reports may contain important safety information that allows us to identify trends and issues currently not perceived as systemic problems, or reveal a perspective that has not been considered.
